An extended vacation visiting as many countries as possible in an 8 month period.

Game Jams
2018-Present

Making games for fun in a limited amount of time, check me out on itch.

About Me

I am a Southern Highlands based fullstack developer with 10 years of industry experience. My special interest is in writing and maintaining web apps, I have a strong focus on web technology and am driven by building elegant solutions to interesting problems.

Experience

Founder
Exeter Web Services   2020

I recently moved to the Southern Highlands and have started up Exeter Web Services, a bespoke WebDev company focusing on local businesses.

Senior Software Engineer
Veyor, Sydney   2019

I joined Veyor as a fullstack developer to expand the feature set of their construction logistics web app. My main focus was codebase cleanliness and adding features in response to customer feedback. While there I was heavily involved in the interview process.

Senior Software Engineer
Canva, Sydney   2015-2018

I worked as a backend developer on the Marketplace team and a lead on the Billing team. For most of my time at Canva I was heavily involved in interviewing and mentoring new engineers. My major projects included launching a new billing system, re-implementing the image licensing backend and decreasing spam signup rates.

Software Engineer
Google, Mountain View   2014-2015

I worked as a backend engineer on the MyMaps team maintaining their custom metadata store. I participated in on-call and release duties and responded to several production issues. I was a key player in the cross team effort to launch Maps for Google Drive.

University Tutor
University of Sydney   2011-2014

I tutored for the first year courses Intro to Programming and Datastructures and Algorithms, and the second year course Database Systems.

Associate Software Engineer
Zeptonics, Sydney   2011-2013

I worked on the command line interface for a low latency switch used in high frequency trading.
